Welcome to EAN.

EAN is web-based software that supports and improves efficiency in the auditing and accreditation systems of industry-managed programs administered by the Performance Review Institute. EAN is developed and maintained by PRI for the benefit of industries where safety and quality are shared values, implementing a standardized approach to quality assurance.

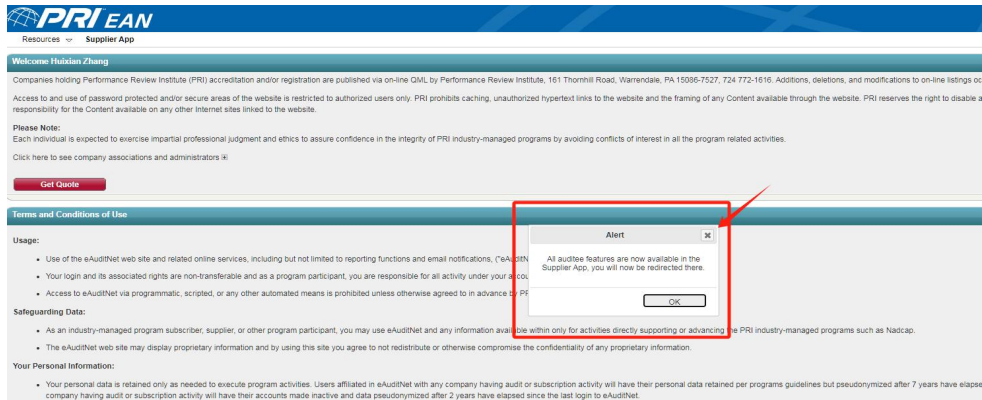

In addition, EAN houses the online Qualified Manufacturers List (QML), which is a searchable database of accredited companies. Procurement can use the QML, at no obligation or cost, to identify and contact companies that may become part of their supply chain, confident that they have demonstrated quality assurance proficiency in their field of expertise.

For more information on the industry-managed and other programs administered by PRI, please visit our website p-r-i.org.
